

CERAMIC PRO

TEXTILE

Ceramic Pro Textile is a clear nanoceramic coating used for water-absorbing fabric and suede. When applied, this technology will transform on the surface to a hydrophobic barrier that repels liquids and increases the longevity of the textiles.

PRODUCT INFORMATION

CATEGORY:	Coating	SPECS:	
FEATURES:	Liquid repellent Hydrophobic Strong durability Self-cleaning Wear resistant Anti-aging	Type:	Semi-Permanent
USAGE AREAS:	Interior Furniture Clothes Footwear	Base:	Water Based
INDUSTRIES:	Automotive Textile Aviation Marine	Water contact angle:	150°
BOTTLE SIZES:	300ml / 20L / 200L	Air cure:	1-2 hours at 25°C (dry surface) 8 hours at 25°C (full dry)
		Application:	Bushing, dipping, spraying
		Thickness of coating:	Up to 1 micron
		Applicable materials:	Natural and absorbent fabrics, cotton, suede, linen
		Consumption:	3-5 ml per m ²

TEST RESULTS

Ceramic Pro Textile has been exposed to SGS testings. SGS is the world's largest and leading inspection, verification, testing and certification company trusted by millions.
